

Zhang Binwen

AI Product Manager

3245485135@qq.com | 181 6379 4793 | github.com/duyu06

Profile

AI product manager with hands-on experience in multi-modal content generation, model fine-tuning, RPA automation, and full-stack prototyping. Capable of translating business requirements into technical solutions with measurable outcomes.

Key Projects

Guoyang AI - Multi-modal Content Platform

End-to-end MVP from script input to video output. Multi-model integration with async task queue and progress.

AI E-commerce Image Generator

Product requirements, prompt template system, model capability breakdown and quality acceptance criteria.

Digital Persona Fine-tuning

7,328 dialogue samples cleaned and labeled. 26 benchmark prompts with 25-point scoring system.

Open WebUI Local Platform

Docker Compose packaging, GPU monitoring, deployment reduced from 4h to 20min.

Multi-Agent Narrative System

AutoGen-based multi-role narrative with state management and branching storylines.

Skills

Product: User flow design, MVP definition, PRD writing, evaluation

AI: RAG architecture, Agent development, Multi-modal generation, Model fine-tuning

Engineering: Go, Python, Vue, Docker
